- Poland (Basic)

PROFILE

Senior Software Engineer with 10+ years of web development experience and deep expertise in modern Angular ecosystems. Currently working in a PE-backed product company, owning frontend architecture, state management, testing strategy, and long-term scalability of a business-critical platform. Strong focus on code quality, automated testing, performance, and maintainability with a product-driven ownership mindset.

PROFESSIONAL EXPERIENCE

Senior Software Engineer - Apomedical

Dec 2021 - Present

- Own and evolve a large Angular application, continuously upgrading to the latest versions
- Design and maintain scalable frontend architecture with long-term support in mind
- Implement state management using NgRx and NGXS based on feature complexity
- Introduced Playwright E2E testing, covering critical user and payment flows
- Ensure frontend reliability for a product serving tens of thousands of users monthly across Europe
- Maintain a codebase with ~5 major modules and collaborate across ~8 feature teams
- Improve developer experience through tooling, conventions, and automation

Angular Developer - IdeaSoft

May 2019 - Dec 2021

- Lead frontend developer for CRM systems using Angular and NgRx
- Direct collaboration with international clients (Sweden, Israel)
- Responsibility for frontend delivery quality and technical decisions

Lead JavaScript Developer - Lazy Ants

Oct 2018 - Apr 2019

- Frontend architecture ownership, code reviews, and technical leadership
- Introduced linting, formatting, documentation standards, and performance optimizations

EDUCATION

Computer Academy STEP - Web Development

Angular Professional Courses (DevPro)

Mentor - GoIT Frontend Program

Continuous professional learning in frontend architecture and testing strategies
